Github repo: <https://github.com/ashkanvafaee/assignment7>

Group Number: 15

Files being submitted: chatBox.java, ChatClient.java, ClientObserver.java, Packet.java, ServerMain.java, Sound.java, UserInfo.java, ChatClient.jar, ServerMain.jar, Goodbye.mp3, Receive.mp3, Send.mp3, Welcome.mp3, REAME.pdf, teamp_plan.pdf

For testing, we initially ran our program using one computer to run both the chat clients and server. When we were able to successfully add friends and send data across multiple clients using one computer, we tested it using two computers. We tested both out group chat functionality and one-on-one chat functionality and ensured that our sound effects were correctly functioning. All testing was done on computers running Windows.
